Tell you Representative to Support the American Jobs Act Today!

The American Jobs Act proposed by President Obama is a critical first step towards putting America back to work, and we call on Congress to pass it now.

Some key points on the American Jobs Act

- Would invest \$105 billion in rebuilding and upgrading America's highways, transit, rail, airports, bridges, ports, schools, and communications and every infrastructure, laying the foundation for long-term economic growth and prosperity.
- Includes \$30 billion to prevent the layoffs of teachers and \$5 billion to prevent layoffs of first responders such as police and firefighters
- Includes a one-year extension of the federal unemployment benefit program
- President Obama has proposed to pay for these job-creating investments by asking the wealthiest Americans to start paying their fair share

Call your Representative today, let them know you are a constituent, and urge them to vote for the American Jobs Act!
